PROFILE

Unity developer and technical designer making games since 2015, from first prototype to shipped build. Co-founder and lead programmer at Studio Moka, leading an 11-person team on CitaDrill, an award-winning roguelite city-builder with 15,000+ Steam wishlists, launching fall 2026 on PC, Xbox, PlayStation and Switch with publisher support. At my best in small teams where I own systems end to end, prototype fast, and help others grow. Looking to join a Montréal indie studio.

PROFESSIONAL EXPERIENCE

Studio Moka · *Co-Founder & Lead Programmer* — 09/2023 – present · Montréal

- Lead programmer and systems designer on CitaDrill, a Unity roguelite city-builder launching fall 2026 on PC, Xbox, PlayStation and Switch, localized in multiple languages, with publisher support.
- CitaDrill won Best Strategic Roguelike at Too Many Games, reached 15,000+ Steam wishlists, and was selected for limited-slot showcases, including a free booth at MIGS.
- Lead and mentor an 11-person multidisciplinary team; run sprint planning and technical direction.
- Built full controller support with automatic input-device detection and dynamic UI button glyphs (Unity Input System).
- Built an in-house playtest analytics pipeline (C# telemetry + HTML dashboard) used to drive balance and design decisions.

Freelance · *Game Developer (Self-employed)* — 02/2025 – present · Montréal

- Help studios and teams bring their games to life: gameplay programming, prototyping and systems design across 2D and 3D projects.
- Tokidos (02/2025 – 04/2025): shipped three educational games in three months as sole developer — Rapunzel, Chicken on the Moon, and Peter and the Wolf (Lua on a custom engine), built for physical/digital cube-based play used in schools.

LaSalle College Montréal · *Sessional Lecturer (Chargé de cours)* — 02/2022 – present · Montréal

- Teach about three classes of ~22 students each semester (~65 students) across two programs: the AEC in Game and Level Design and the DEC in Computer Science and Technology.
- Take Computer Science students from their first Unity project to a playable vertical slice, showcased at the end of each semester.
- Teach 3D modelling, texturing and UV mapping with Photoshop and Substance, and visual-scripting prototyping for game designers.

Université Laval / UJM · *Research Professional & Game Developer* — 07/2021 – 03/2025 · Remote

- Developed Composia and posture-gamification games in Unity for music education.
- Integrated real-time motion tracking into classroom-ready gameplay, working with educators and engineers.

Earlier experience · Co-founder & game designer, Foibles, a completed party card game (2018 – 2022) · Multimedia teacher, M College of Canada (2020 – 2022) · English instructor, ISART Digital Montréal (2020 – 2022) · Game development instructor, Studio XP (2017 – 2021) · Project coordinator, Fusion Jeunesse (2017 – 2019)

TECHNICAL SKILLS

- **Engine & languages:** Unity, C#, Lua
- **Gameplay & systems:** gameplay programming, systems design, procedural generation, UI, controller/input (Unity Input System)
- **Interactive tech:** real-time motion tracking, live data-driven visuals, telemetry and analytics
- **Workflow:** Git, Unity prefab merge tooling (YAMLMerge), rapid prototyping, Agile sprint planning
- **Leadership:** team lead, mentoring, college-level teaching
- **Languages:** French and English, fully bilingual

EDUCATION & AWARDS

- **RNCP, Concepteur de Jeu Vidéo (Game Design)** — ISART Digital Montréal · 2016 – 2019
- **Coup de Cœur (Jury's Favourite), 2019** — ISART Digital Montréal, for final-year game project
- **Game Production certificate** — ELVTR
